## PROFESSIONAL SUMMARY

Innovative frontend developer specializing in JavaScript and React.js, adept at creating visually stunning, responsive interfaces. Expert in Generative AI and swift adaptation to new technologies. Exhibits excellent collaboration and problem-solving skills to enhance user experiences and optimize application performance while ensuring code quality.

## PROJECTS

### 1. WeatherApp: Real-time Weather Forecast | 🌐 | 🐙

React | JavaScript | HTML5 | CSS3 | Responsive Web Design

- Developed a responsive interface to display current weather and 5-day forecast using React.js.
- Integrated the OpenWeatherMap API to fetch real-time weather data.
- Implemented a search feature for users to easily access weather information by city.
- Optimized the app for cross-browser compatibility and performance.
- Collaborated with team on version control workflows using Git.

### 2. Unity Hub: Collaborative Community Platform | 🌐 | 🐙

React | JavaScript | HTML5 | CSS3 | Responsive Web Design | Node.js | Express.js | MongoDB | Socket.io | JWT

- Built user-friendly authentication UI with smooth transitions and validation.
- Developed a personalized dashboard to enhance user experience after login.
- Integrated real-time updates using Socket.io for live notifications and interactions.
- Worked closely with backend team to connect frontend components with server-side logic.
- Utilized responsive web design to ensure seamless use across devices.
